style to the
great outdoors.

Sun Salutations

Guests will do a double take when they see these period chairs in your garden instead of your living room. (We've set the chairs against the new digitally reproduced wallpaper Beech Leaves from the Loui Loui Collection at Stark Wallcovering.) But there's no mistake: The hand-carved teak frames are available in four finishes, the fabric is solution-dyed acrylic, and the foam cushions are mildew-resistant and don't retain water. (Louis Soleil chairs designed by John Hutton for Sutherland; upholstery fabric from Perennials Outdoor Fabrics)
